| **When** | Di, 15. November 2016 - Do, 17. November 2016 |

## Description

iMOC - 4th International Molded Optics

The 4th International Molded Optics Conference iMOC, will be held from the 15th to 17th of November 2016 in Bremen, Germany, hosted by the Laboratory for Precision Machining, LFM. After three successful conferences in the years 2007, 2009 and 2012 also this event will cover all fields of replicated optics from optics
design and mold making to glass and plastic replication as well as associated measurement techniques. Oral sessions will offer the opportunity to gather recent information from the field and discuss intensively alongside with international experts from industry and academia.

A full scope of technical and scientific presentations, poster and commercial exhibitions as well as lab visits are a unique possibility to gain detailed knowledge of state-of-the-art technologies. Furthermore, significant time for discussion with national and international colleagues will be given during the conference breaks and the evening networking dinner.

Updated information and exact dates will be available in due time on
www.imoc-conferences.de.
