OSA Frontiers in Optics + Laser Science APS/DLS

Event - OSA Frontiers in Optics + Laser Science APS/DLS ↻

Title	OSA Frontiers in Optics + Laser Science APS/DLS
When	So, 16. September 2018 - Do, 20. September 2018

Description

OSA Frontiers in Optics + Laser Science APS/DLS

The meeting unites The Optical Society (OSA) and American Physical Society (APS) communities for five days of quality, cutting-edge presentations, fascinating invited speakers and a variety of special events. The conference was thoughtfully revised, combining the best of the past and adding vital, innovative elements.

The topics ot this conference are:

Conference Themes

The Technical Conference is now organized around four themes that leverage the intersection between science and applications— the end result is intended to illustrate the research within the technology. The four themes:

- Automotive
- Nanophotonics and Plasmonics
- Quantum Technologies
- Virtual Reality and Augmented Vision
