SPIE Structured Light 2019

Event - SPIE Structured Light 2019 ↻

Title	SPIE Structured Light 2019
When	Di, 23. April 2019 - Fr, 26. April 2019

Description

SPIE Structured Light 2019

This conference is part of Optics and Photonics International Congress. Joint sessions will focus on structured light and measurement techniques for sensing and imaging in biological material. Recent advances are explored in three parallel conferences: the Optical Manipulation and Structured Materials Conference (OMC),
the Biomedical Imaging and Sensing Conference (BISC), and the Optical Technology and Measurement for Industrial Applications Conference (OPTM), with joint sessions to explore how these research areas overlap for structured light technologies.

For UPOB-Members of special interest is the conference Optical Technology and Measurement for Industrial Applications.
