

10th International euspen Conference

Event - 10th International euspen Conference ↗

Title	10th International euspen Conference
When	Mo, 31. Mai 2010 - Fr, 4. Juni 2010

Description

10th International euspen Conference

The 10th International euspen Conference was focused on the latest advances and market developments in precision processes and manufacturing, as well as fabrication, metrology and cutting-edge materials in the precision, micro and nano engineering sectors.

Topics were within one of the following thematic areas:

- Emerging Patterning Technologies and Methods
- Wind Turbines – Precision Engineering Challenges
- Medical Applications of Precision Engineering
- Nano and Micro Metrology
- Ultra Precision Machines and Control
- High Precision Mechatronics
- Ultra Precision Manufacturing and Assembly Processes
- Important/Novel Advances in Precision Engineering and Nano Technologies
