LANE 2020 - 11th CIRP Conference on Photonic Technologies

Event - LANE 2020 - 11th CIRP Conference on Photonic Technologies ↻

Title	LANE 2020 - 11th CIRP Conference on Photonic Technologies
When	So, 6. September 2020 - Do, 10. September 2020

Description

LANE 2020 - 11th CIRP Conference on Photonic Technologies

During the last LANE, the organizers offered an international platform for the exchange of perspectives, results and solutions concerning photonic technologies.

In the talks especially recent developments in the field of laser material processing were addressed.
In particular, the conference program consisted many talks covering the following topics:

- Additive Manufacturing
- Beam sources & components
- E-Mobility/Batteries
- Fast laser beam manipulation
- Laser assisted processes
- Laser beam welding, brazing & soldering
- Laser beam cutting & drilling
- Precision processing with ultrashort laser pulses
- Simulation & modelling
- Sensing & control
- Surface treatment & forming
